

Condell Street Reserve final upgrade plan

We asked our community to share ideas and feedback on the playground and pathways at Condell Street Reserve.

From these ideas, we developed a draft plan which was made available for further community feedback.

We have incorporated both rounds of feedback into the final design.

The final plan for the playground upgrade includes:

- A new timber multi-play set which includes a ramp, stairs, clatter bridge and tunnel
- More climbing equipment including a spider web climber, a rock wall, a climbing cube, a fireman's pole and monkey bars to provide more challenging play opportunities
- Two customised shop counters to encourage dramatic play
- Introduction of rocks and a log in the playground area to provide some natural play opportunities. As Condell Street Reserve is a small park, we are restricted in the amount of space available to

accommodate this natural play

- Slight increase (1m) of playground footprint to provide room for shade sail posts

Other changes in Condell Street Reserve:

- Replacement of central asphalt pathway which is damaged
- Removal of the concrete corners of the circular pathway
- A new asphalt pathway connecting the playground with Condell Street for improved access
- Introduction of shade sails in response to requests for additional shade
- Two new trees in the park to provide additional shade
